Professional Summary

I am a Frontend Software Engineer with a degree in Information Systems Management and a technical background in Industrial Electronics. My experience spans web design, frontend development, and industrial automation, with working knowledge of RSLogix PLC Ladder Logic, HTML, CSS, JavaScript and Microsoft Power BI. I enjoy combining technology, design, and problem-solving to develop responsive, user-friendly applications that are both visually appealing and highly functional. My goal is to create efficient, scalable solutions that provide meaningful value to users and organizations alike.
